KINGSTON

KITCHEN & BATH

INSTALLATION INSTRUCTIONS Shower Seat-Wall Bracket Mount

Before Installation:

For your own safety, this seat should be installed by a licensed professional, it is recommended that this seat be properly secured to a 2" x 6" piece of lumber or larger as wood bracing, at all points where the seat is to be secured.

Weight limit on this seat is 265 Lbs. (120 KGS) max.

Installation steps:

- 1. Locate the desired seating position. To comply with ADA standards, seat should be mounted at a height where the seating surface in its downward position is at a height of 17" to 19" above finish floor. Please check all State and Local Building codes.
- 2. Mark a leveled line on the wall at the desired height of the seating surface (top of the seat), mark another leveled line 4-5/8" below the first line, place enclosed template making sure to align the center of the mounting brackets with the lower line marked on the wall and mark the location of the mounting holes both for the round mounting brackets as well as the guide bracket.
- 3. Drill 1/4" pilot holes at the points marked for the mounting bracket only, after applying a bead of silicone based caulking at the back of each mounting bracket, place the seat at the desired location secure to the wall using the enclosed #14x 3" wood screws, clean any excess caulking.
- 4. Before securing the guide bracket check for the movement of the seat and the support leg as it moves in the guide bracket, lower the seat so that it is in a horizontal position, insert support bracket and visually confirm that it is resting at the bottom of the guide bracket. Drill 1/4" holes at the location of the holes for the guide bracket.
- 5. Apply a bead of silicone based caulking around the perimeter of the back plate of the guide bracket and secure the guide bracket, clean any excess caulking.

Maintenance: Dry after every use, clean with mild soap and water.

Please Read Disclaimer

The manufacturer or distributor of this product shall not be held liable for installation actions taken or not taken. There are many details of installation that are assumed to be general construction knowledge to experienced installers; which are not included in these instructions.
