

Hand Shower Kit

This exploded view diagram illustrates the assembly of a shower head. The components are numbered 1 through 20. The main assembly path is shown vertically, starting from the shower arm (11) at the bottom, which connects to the shower head body (12). The body (12) has a series of internal components (13, 14, 15, 16) that lead to the shower head face (17). The face (17) is secured by a cap (18) and a cap screw (20). A separate exploded view shows the shower head face (17) being attached to the shower arm (11) using a nut (9), a washer (10), and a cap screw (11). A separate exploded view shows the shower head face (17) being attached to the shower arm (11) using a nut (9), a washer (10), and a cap screw (11). A separate exploded view shows the shower head face (17) being attached to the shower arm (11) using a nut (9), a washer (10), and a cap screw (11).
