

## Repair Instruction Manual for KBRP112D/KSRP1241D Diverter

Tools	<p style="text-align: center;">Needle Nose Pliers</p> 	<p style="text-align: center;">10mm Hex Allen Wrench</p> 
Repair part	<p style="text-align: center;">Diverter part (#KBRP112D/KSRP1241D)</p> 	
Step	Photo	Description
1.		<p>Loosen the adapter beneath the spout by hand or a proper plier by turning counter-clockwise. Pull out the spout from the body.</p>
2.		<p>Use a 10mm Hex Allen wrench to remove the diverter by turning counter-clockwise and clean all impurity or debris inside the body. Then install a new diverter onto the body by turning the Allen wrench clockwise.</p>

3.

Install the spout onto the faucet body by turning the adapter clockwise with hand.
